

# A682-A56 Burnley to Colne Cycle Facilities

## Project Description Sheet

### Location

A682-A56 Burnley to Colne

### Client

Lancashire County Council

### Commenced

October 2001

### Key Project Elements

Survey and measure of the site

Design of cycle route scheme.

Drawings, Specification and BoQ documents to LCC specification.

PSA Design were commissioned by Lancashire County Council to design a cycle route scheme along the A682-A56 Burnley to Colne.

The design was in accordance with the LCC 'Cycle Guidelines' document, the Department for Transport Traffic Advisory leaflets and the 'Cycle Friendly Infrastructure' guidelines.

The project involved the layout design of approximately 10Km of new cycle routes to integrate with existing provisions. Both on and off-line designs were used to maximise safety, whilst keeping to a tight budget.

The road was surveyed on site, and digital OS bases were used to aid the design of the cycle route using AutoCAD.

PSA Design prepared drawings, specification and a Bill of Quantities to enable the in-house contracting team to implement the design.
