

Blackpool Central Corridor Phase 1 Infrastructure Works

Location

Sheet

Seasiders Way, Blackpool

Client

Blackpool Borough Council

Completed

Ongoing

Key Project Elements

Car Park Design Physical Drainage SUDS Swept Path Analysis Landscaping /Accessibility

PSA Design were commissioned to assist with the infrastructure design on the Central Gateway scheme on behalf on Blackpool Council. This required design of all car parks, roads & field drainage.

A complicated drainage network was designed utilising the existing system if feasible. Soakaways and field drains were installed wherever possible to promote sustainable discharge.

Level design was undertaken including access ramps around the perimeter of the site. There were tight thresholds to work to given the presence of underground storage tanks adopted by United Utilities.
